

Lister

**NEXUS ELITE
SENSOR**

The ultimate in high-powered shearing performance

SUPERIOR SAFETY | POWERFUL PERFORMANCE

All Lister Nexus Elite Sensor shearing machines are supplied complete with an advanced electronic current Safety Sensor to prevent lock-ups.

Every Nexus Elite includes

- ✓ QR 1-step Quick Release Rigid Downtube
- ✓ Wall mounting bracket
- ✓ Built-in Electronic Safety Sensor
- ✓ 3-speed adjustment

Nexus Elite Sensor Shearing Machine

Used at World Championships & shearing shows around the globe

POWERFUL | ROBUST | VERSATILE | SUPER QUIET | SAFE

Specifications

Start-up Current	7 amps
3 Speed Options	2800, 3200 & 3500 rpm Factory set at 3500rpm
Motor power	700 watt
Hz	50Hz
Voltage	220-240 volt
Phase	Single phase
Weight	13kg Machine 4kg Downtube Total weight 17kg

Features & Benefits

-  **QR 1-step Quick Release Solid Downtube**
 - The QR system allows for swift and easy-to-use attachment & release of the drive from the motor
 - Ensures the correct setting of the downtube, without the need for tools.
 - 1-step locking clamp means quick set-up time for easy portability, a bonus for contractors and mobile shearers
-  **Built-in Electronic Safety Sensor**
 - Advanced protection against handpiece lock-ups
 - Minimising risk of injury
 - Ensures superior shearing shed safety
-  **Sturdy but lightweight design that doesn't compromise on power or robustness**
 - At just 17kg the unit is easy to carry and install
 - Suitable for use on either mains or generator power
 - Protective motor support foot for stability, easy installation, transportation and servicing
 - Impact resistant casing for long life & durability
-  **Powerful 700w Motor with low starting current**
 - Reduces risk of a power supply overload when multiple machines are in use

New Solid Drive Benefits

-  **Reduced shearing shed noise**
 - Smaller cogs result in quieter operation
-  **Smoother running with less heat & vibration**
 - New tube joint design with bearings behind the cogs
-  **Long lasting protection**
 - New joint guard design is smaller and ergonomically designed for longer life, as it prevents wool from entering the cogs
